

We're drinking more calories than ever.

Introducing Yum Drops® Natural Flavoring Concentrates for Water

Great for:

- ✓ Weight watchers
- ✓ Calorie counters
- ✓ Health conscious consumers
- ✓ Diabetics
- ✓ Diets and Systems
- ✓ Fitness, exercise and sports training
- ✓ Dietician's promoting hydration
- ✓ Nutritionist's promoting hydration
- ✓ Anyone that needs to drink more water

Straight Facts:

- ❖ *Everyone is drinking more water to maintain good health*
- ❖ *Most diets and Nutritionist's call for drinking more water than normal*
- ❖ *When you exercise or play golf, dehydration is a real problem*
- ❖ *Now you easily enhance the flavor of water so it tastes great and you drink more of it*
- ❖ *Water and your favorite Yum Drops® Flavoring is **"the perfect diet drink"***

Yum Drops®, **"Do Your Drink A Flavor!"** simply stated, promotes hydration and makes drinking more water easier and fun. You control the subtleness and strength of the flavoring and that is the key with our drops. Too sweet and you won't drink it for long, but subtle flavoring satisfies your taste experience and allows you to continue to drink the levels required to sustain proper diets and help lose weight. Just a hint of stevia to enhance the taste!!!

It's a fact: water is the best thing for diets, calorie counters and weight watchers: people who just want to lose weight. Some studies have shown **"Water makes your metabolism burn calories 3% faster."** If there is a slight dehydration, the thirst mechanism may be mistaken for hunger, causing the person to eat instead of drinking water to hydrate. Some foods contain some water. If proper levels of water are not maintained, the person may actually eat more foods to gain the necessary water levels the body is demanding. Drinking water helps lose weight.

“The Perfect Thirst Quencher: water and Yum Drops® Flavoring”.
